ADITYA SAWANT

SOFTWARE DEVELOPER | AI/ML/DS ENTHUSIAST

adityasawant-in.vercel.app | adityasawant7798@gmail.com | adityasawant208@gmail.com

SUMMARY

AI and software developer with hands-on experience in Python, web development, and machine learning. Currently pursuing a Bachelor's degree in Artificial Intelligence and Data Science. Experienced in building web applications and AI-based projects using Python, React.js, Node.js, TensorFlow, and Streamlit, with a focus on solving practical problems through technology.

TECHNICAL SKILLS

HTML,CSS,JS	MONGO DB	NODE JS
REACT JS	SQL	TAILWIND CSS
GIT	GIT HUB	PYTHON

PROJECTS

Geetanjali Fitness.

- Developed a professional fitness website "Geetanjali Fitness" for a client using React.js (frontend) and Node.js (backend).
- Utilized MongoDB as the primary database for storing user and service data.
- Used EmailJS to enable real-time email notifications from form submissions.
- Worked closely with the client to meet business goals and functional requirements.
- Project is live and actively used by the client to manage fitness-related services.

Project URL - https://geetanjali-yoga-fitness-zone.vercel.app/

AR Based Home Previsualization Application.

- Developed AR-Based Home Previsualization Application using Unity and C#.
- Implemented marker-based AR to display house blueprints on physical markers.
- Added a cost estimation feature for budget planning.
- Created a companion website with Three.js for interactive 3D models.
- Won 1st prize in college-level project competition.

Project URL - https://homewise-vision-prod.vercel.app/

EcoScan – AI-Powered Waste Segregation & Classification

- Developed an AI-powered waste classification system using Python, TensorFlow/Keras, and InceptionV3-based transfer learning.
- Trained a deep learning model to classify waste images into 6 different categories using a dataset of approximately 2,184 images.
- Implemented an image preprocessing and prediction pipeline for converting uploaded or captured images into model-ready inputs.
- Built an interactive Streamlit application allowing users to upload images, capture waste using a camera, and receive classification results.
- Provided users with appropriate disposal/handling instructions based on the predicted waste category.

Live Demo / LinkedIn - www.linkedin.com/in/adityasawant208

PCO Sense – Machine Learning Application

- Developing an AI-based computer vision system to automatically detect and count ovarian follicles from ultrasound images, addressing the time-consuming process of manual follicle counting.
- Designed to assist the sonographic component of PCOS assessment by providing an automated follicle count used alongside clinical evaluation.
- Implementing the solution using Python and machine learning techniques, including image preprocessing, model development, and evaluation.

EDUCATION

DIPLOMA **2021 - 2024**

Government Polytechnic Mumbai.

- Completed Diploma in Information Technology.

Bachelor of Artificial Intelligence Engineering **2024 - Expected 2027**

Datta Meghe College of Engineering.

- Pursuing a Bachelor's degree in Artificial Intelligence and Data Science.

EXPERIENCE

6 Months internship.

- Worked as an Embedded developer in Smartdwell Technologies.
- Gained knowledge about how hardware interracts with softwares.
- Learned about ESP 32.

2 Months internship (Part-time)

- Worked as an MERN Stack developer in Smartdwell Technologies.
- Gained knowledge about Realworld Projects.
- Created multifunctional Dashboards.
- Handled API'S.

SOFT-SKILLS

- Fast Learner
- passionate
- Teamwork
- Problem-Solving
- Creativity
- Time Management
